

## Job Title: Construction Mechanic and CDL Driver

### Job Summary:

We are seeking a skilled Mechanic and CDL Driver to join our team. This dual role involves ensuring the efficient operation, maintenance, and repair of various construction equipment and machinery and operating commercial vehicles requiring a valid CDL. Your role will involve performing routine inspections, diagnosing issues, and executing necessary repairs to keep equipment in optimal working condition.

### Responsibilities:

1. Conduct routine inspections of construction equipment and machinery to identify potential issues.
2. Perform preventive maintenance tasks to ensure equipment reliability and longevity.
3. Diagnose mechanical, electrical, and hydraulic problems and implement appropriate repair solutions.
4. Conduct thorough testing and quality checks following repairs to verify proper functioning.
5. Maintain accurate records of maintenance and repair activities, including parts inventory and work orders.
6. Collaborate with other team members to prioritize and schedule maintenance tasks to minimize downtime.
7. Operate commercial vehicles to aid in jobsite mobilization such as transporting machinery and job materials as needed.
8. Adhere to safety protocols and regulations to maintain a safe working environment for yourself and others.

### Qualifications:

1. Valid CDL (Commercial Driver's License)
2. Ability to work independently and as part of a team.
3. Physical strength and stamina to lift heavy objects and perform manual labor as required.
4. Proven experience as a construction equipment mechanic or similar role, with expertise in diagnosing and repairing mechanical and electrical systems.
5. Strong knowledge of hydraulic systems, diesel engines, electrical circuits, and other components commonly found in construction machinery.
6. Excellent problem-solving skills and attention to detail.
